Corporate Identity Guide

Brand positioning, visual identity, voice guidelines, and competitive strategy for VibeGen — the BYOK AI app builder.

Brand essence

MISSION

Let any developer turn a sentence into a deployable web app — without paying a platform tax or surrendering their code.

VISION

A world where every developer owns their AI-generated work outright, hosted anywhere, forever.

POSITION

The BYOK AI builder. Bring your own Claude API key. Fast, open, and honest about what it is.

BRAND PROMISE

"Describe it. Generate it. Own it."

VibeGen is the only AI app builder where the platform has zero access to your code, your key, or your usage — by design, not by policy.

Core values

Radical ownership. Every file VibeGen produces belongs entirely to the user. No watermarks, no platform dependency, no subscription gate on your own code.

Zero trust by design. API keys are never stored server-side. They travel per-request and vanish. Open source so anyone can audit this claim.

Speed over ceremony. No account required. Paste your key, describe your app, ship. Time from idea to deployed URL: under two minutes.

Cost honesty. You pay Anthropic directly at their public API rate. VibeGen never marks up tokens or hides usage behind opaque credits.

Open by default. MIT license. Fork it, self-host it, compete with it. The product earns loyalty — it doesn't coerce it.

Target audience

PRIMARY	Independent developers and technical founders who already have an Anthropic API key and want to prototype fast without platform lock-in.
SECONDARY	Hobbyists and open-source contributors building small tools for themselves or their community — cost-sensitive, privacy-aware.
TERTIARY	Startup teams that want Claude-powered internal apps they can self-host or deploy on their own infrastructure without a vendor in the loop.

Visual identity — logo

MARK ANATOMY

The mark represents two input streams — the **prompt** and the **model** — converging at a single generation node.

The left arm is primary indigo `#4F46E5`, the right arm is secondary violet `#7C3AED`. The convergence node is always primary indigo.

CLEAR SPACE

Maintain a minimum clear space equal to $1 \times$ the icon height on all four sides. This is the dashed boundary shown left.

Never place text, other logos, or visual elements inside this protected zone.

DON'T

Stretch or distort the mark

Change arm colors to non-brand hues

Place on a busy or patterned background

Use the mark without the convergence node

Add drop shadows or glow effects

Reproduce the wordmark in any font other than JetBrains Mono

Visual identity — color

PRIMARY PALETTE

**Indigo**

#4F46E5

Primary actions,
logo left arm, CTAs**Violet**

#475569

Secondary body
text**Slate 400**

#94A3B8

Captions,
metadata, labels**Slate 50**

#F8F AFC

Page backgrounds,
card fills

COLOR USAGE RULES

Indigo (#4F46E5) is the only approved fill for primary CTA buttons.

Never use both indigo and violet at equal visual weight in the same layout element — one must be dominant.

White text on indigo passes WCAG AA at all sizes. Never place gray text on indigo.

Visual identity — typography

UI TYPEFACE

Inter

All product UI, body copy, documentation. Weights: 400 (regular) and 500 (medium) only.

CODE & WORDMARK TYPEFACE

JetBrains Mono

Wordmark, code blocks, technical labels, and the app's code viewer. Weight: 400 and 500.

Wordmark	V I B E G E N	Mono / 22px / 500 / ls:5px
Display	Build anything in one sentence	Inter / 32px / 600
Heading H1	Your code. Your server.	Inter / 22px / 600
Heading H2	No account required	Inter / 18px / 500
Body	Your API key is used per-request and never stored. Download the generated HTML and host it anywhere you like.	Inter / 14px / 400
Code label	claude-sonnet-5	Mono / 13px / 400
Caption	MIT License · Open source · vibegen.dev	Inter / 11px / 400

Brand voice

tone attributes

Key messages

"VibeGen is the only AI app builder where the platform has zero access to your code, your key, or your usage — by design, not by policy."

"Every app you generate is a single HTML file you can open offline, host on GitHub Pages, or give to a client. No VibeGen account ever required to run it."

"You pay Anthropic at their public API rate. VibeGen takes nothing per token. Monetization is voluntary: a \$9/month Pro plan and a Ko-fi tip jar."

"Fork the repo, read the code, run your own instance. We publish under MIT because if the product is good you'll choose us anyway."

10

Brand application

WEBSITE

vibegen.dev — deep navy hero, indigo CTA, monospace wordmark at top-left. Tagline: "Describe it. Generate it. Own it."

SOCIAL MEDIA

GitHub, Reddit, X: indigo icon mark as avatar. Bio: "BYOK AI app builder · MIT · No account · vibegen.dev"

PRODUCT UI

Inter for all UI text. Indigo for primary button only. Monospace for all code output, model selector, and API key field.

GITHUB

Repo name: vibegen. README hero uses icon mark as PNG. MIT license badge first. No dark patterns in README.

REDDIT / FORUMS

Lead with the open-source angle, BYOK angle, and zero-account angle. Never "our AI platform." Always link to the repo.

KO-FI

Page name: vibegen. Profile description matches brand voice. No promises of features for supporters — it's a tip jar, not a roadmap.
